

£££ Sproule Trading System £££

Sproule Trading System

This system uses:

- Stochastics
- MACD
- RSI

This system can be used for trading Forex, Indices or Shares.

*Usually the Stochastics fasting line will cross over the slow moving line before the MACD's fast moving line crosses it's slow moving line, but, sometimes the MACD's fast moving line will cross just before the Stochastics fasting moving line.

If you follow the flow and get to the last decision and it's a 'No Trade', DON'T TRADE, if you do you will lost. It's a system that works if you follow it properly.

Any questions or comments please email me.
