Articles and analysis about financial market

Connection established between technical analysis and astrology

Hello,

I'd like to recommend you some great articles that I discovered on the web about financial astrology. Even though you can find on the internet some articles with the same topic, I tell you from the start that this approach is different and very special. The connection established between technical and fundamental analysis and astrology (European and Vedic) are 100% original. This way you will better understand the financial analysis and be able to better interpret it and your decisions during trading sessions will be more informed. The evolution of the financial market will be revealed to you in a new and more interesting light. Everything will get clearer and will make more sense.

Here is some titles:

[William Ganns Square of Nine](#)

[Important aspects between planets and their influence over financial markets](#)

[William Gann - A Legend](#)

[Trend lines, support and resistance](#)

[Indicator MACD](#)

[Rahu and Ketu](#)

[Do moon phases influence financial markets?](#)

[Perigee and Apogee of the moon](#)

[What are the ephemerides and how do they help us](#)

[Fibonacci](#)

[Stochastic Oscillator](#)

I will remind you again that all the financial markets are interconnected. Each one can directly or indirectly be correlated to Dow Jones (70-90% fidelity and accuracy). The money are the same, most of the people trading are the same so it is only natural that a single look on DOW's evolution can tell you with 70-90% accuracy where should each moment be the price for oil, gold, stocks or the exchange rate for EUR/USD. They are all interconnected!

Focused on the American index, Dow Jones (DOW) and EUR/USD, i found these products:

Dharmik Daily Indices with Signals:

- Daily analysis for Dow Jones with daily trend, Highs and Lows of the trading session, inflexion zones of the price, other remarks;
- Comments about the next 3-5 days evolution;
- You will get **the next day the analysis for Dow Jones, for the day** that just passed, its level of accuracy, trading sceneries for that day (one possible version), other remarks.
- With this product it's provide clear signals for entering the market;
- These signals are only for US Indices (Dow Jones especially);
- Signals for intraday traders;
- Offers 2-3 signals/month; this signals are sent in daily analyses; the signals consist in exact instruction to enter the market (exact Price) and also Stop Loss and Take Profit levels; usually these trades last between 1-2 hours to maximum 1 day until they should be closed (with TP or SL depending on the market);
- All analysis are sent daily by email to you, before New York session starts.

Dharmik EUR/USD with Signals

- Daily analysis for EUR/USD with daily trend, Highs and Lows of the trading session, inflexion zones of the price, other remarks;
- Comments about the next 3-5 days evolution;
- All analysis are sent daily by email to you;
- Clear signals for entering the market;
- These signals are only for EURUSD;
- Signals for intraday traders;
- Offers 2-3 signals/month; this signals are sent in daily analyses; these signals consist in exact instruction to enter the market (exact Price) and also Stop Loss and Take Profit levels; usually these trades last between 1-2 hours to maximum 1 day until they should be closed (with TP or SL depending on the market);

Sincerely,

Mirabo Andreea
